## PROFESSIONAL SUMMARY

With project management experience transitioning to a software developer role, I am passionate about coding and eager to learn new skills and technologies. Throughout my career, I have successfully managed and executed multiple projects, ensuring their timely delivery and adherence to quality standards. With a strong foundation in Python programming, SQL, and a deep understanding of software development principles, I excel in problem-solving, debugging, and coordinating coding projects. I am well-equipped to contribute to innovative projects and effectively lead and coordinate teams.

## SKILLS

- |                      |                               |                   |
|----------------------|-------------------------------|-------------------|
| • Python             | • SQL                         | • Git & Github    |
| • CSS & HTML         | • Bootstrap                   | • Flask Framework |
| • Project Management | • Inventory Management System | • REST API        |

## EXPERIENCE

Project Coordinator & Consultant (Remote Working) April 2018-June 2022  
Webbytes Sdn Bhd | Jakarta & Kuala Lumpur

- Successfully managed the end-to-end project for the launch of a new store, coordinating with cross-functional teams, vendors, and stakeholders, resulting in a seamless and on-time store opening.
- Implemented efficient project management processes, such as clear communication channels, regular progress tracking, and issue resolution mechanisms, ensuring effective coordination and collaboration among teams, and minimizing delays or bottlenecks.
- Led the development and implementation of a software training program, equipping team of stakeholders with essential skills and tools, resulting in improved project outcomes.

IT Support Analyst May 2016 – December 2017  
PT Gapura Angkasa | Jakarta

- Collaborated with vendors and stakeholders to assess business requirements and recommend technological solutions, contributing to the selection and implementation of a new IT service management system, resulting in improved incident resolution times and enhanced user satisfaction.
- Developed and maintained project documentation, including technical specifications, user guides, and standard operating procedures, ensuring effective knowledge transfer and facilitating ongoing support and maintenance.

## EDUCATION

Bachelor of Informatics Engineering September 2015  
Telkom University, Bandung, Indonesia
